2**012- Sony Mobile(china)**
1   department interface
Work with Lund/Toyo team to follow project guideline
What I do: Receiving request form main project, I analysis and breakdown to internal team on-site team and offshore team. After execution,I collect and analysis data to meet the achievement.
2   Android feature PM
What I do: 1   clarify the requirement with end user
                   2   request team member form each competence line to setup feature team
                   3   discuss the implementation of feature with team member
                   4   plan and track the feature project
                   5   make sure the feature can be delivered on time
                   6   make sure the feature code can be received by competence team and merge them into main branch
3   Android developer and test
What I do: 1   build up test competence team
                   2   Define code review process and others
                   3   Setup improvement plan for each member
                   4   setup white-box test architecture and role in test team and rule in the test process

2007-2011 sony-ericsson community company
1   **T-Mobile Community service**
what I do: 1   Analysis requirement and design manual/Junit test case.
                   2   Setup automation test environment.
                   3   Plan test execution according project.
2   HVPD/HB108/HB109 Central platform
What I do: 1   Arrange test execution as team lead
                   2   estimate the leakage base on module.
                   3   bug analysis according log and source code
3   HB108 Entry platform
what I do: 1   Analysis spec of operator(like AT&T)
                   2   Design test case
                   3   Setup test environment

2004-2007 Motorola technology company
1   **Motorola GSR9 Wireless network**
what I do: 1   wireless network validation according 3GPP.
                   2   Setup and configure core network.
                   3   setup OMC and configure wireless network by it.

2   **Motorola GSR8 Wireless network**

what I do: 1   wireless network validation according 3GPP.

2   setup OMC and configure wireless network by it.

2003-q2004 Feiyu micro electric company

1   Frequency synthesizer

what I do: 1   schematic design

`   2   PCB layout

3   write control code

2   Gyroscope amplifier

what I do: 1   schematic design

`   2   PCB layout
